The live export trade

Cattle & Sheep

International Live Cattle Trade

- Australia & Indonesia
- South Asia
- Southeast Asia
- East Africa & Middle East
- Brazil & Lebanon

Main issues in the Australia-Indonesia trade

- heat stress in European cattle breeds
- slaughter without stunning

How would you assess metabolic depletion in these animals at the end of their journey?

Main issues in the South Asian trade

- restriction on transport during daytime long journeys
- high stocking density problems with downer cattle
- poor vehicle design contributing to injuries
- poor handling methods
- metabolic depletion at the end of the journey
- heat stress at markets especially in water buffalo

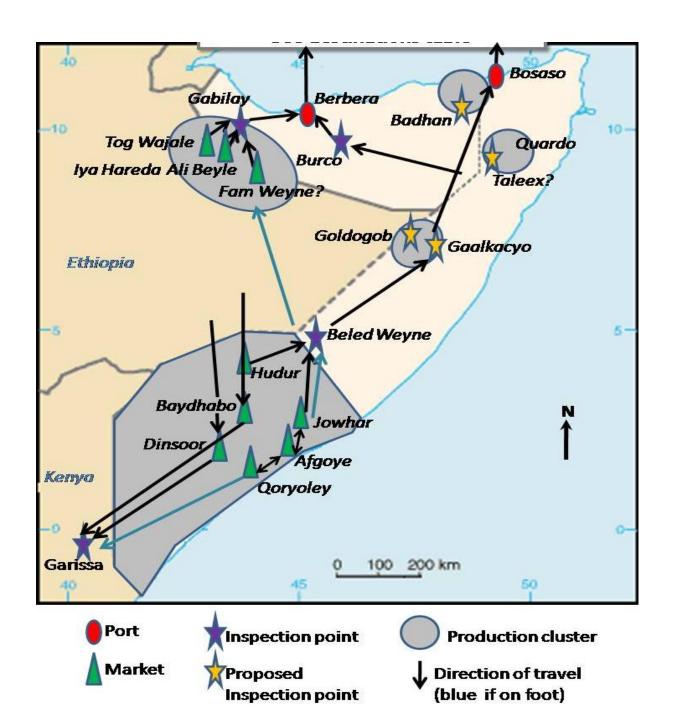

Main issues in the SE Asian trade

- animal disease dispersal
- welfare issues have not been investigated

East Africa – Middle East trade

- Sources:- Ethiopia, Somalia, Kenya
- Demand in the Middle East Egypt, Saudi Arabia, Yemen, Kuwait
- Foot & Mouth Disease 2006
- Rift Valley Fever
- FAO interested in supporting the trade
- Welfare issues have not been investigated

Issues in the Live Cattle export trade

- Long distances
 - dehydration
 - metabolic depletion
- Injuries
- Suitability of particular breeds or genotypes
- Disease transmission
- Marketing and slaughter conditions in the importing countries

Sheep export Australia & Middle East trade

Sheep trade between Australia & Middle East

- Haj seasonal, involving large numbers of animals
- 3 to 4 week journeys
- typically 40,000 sheep per ship, but can be up to 60,000
- mortality due to

inanition

salmonellosis

pneumonia

loading injuries

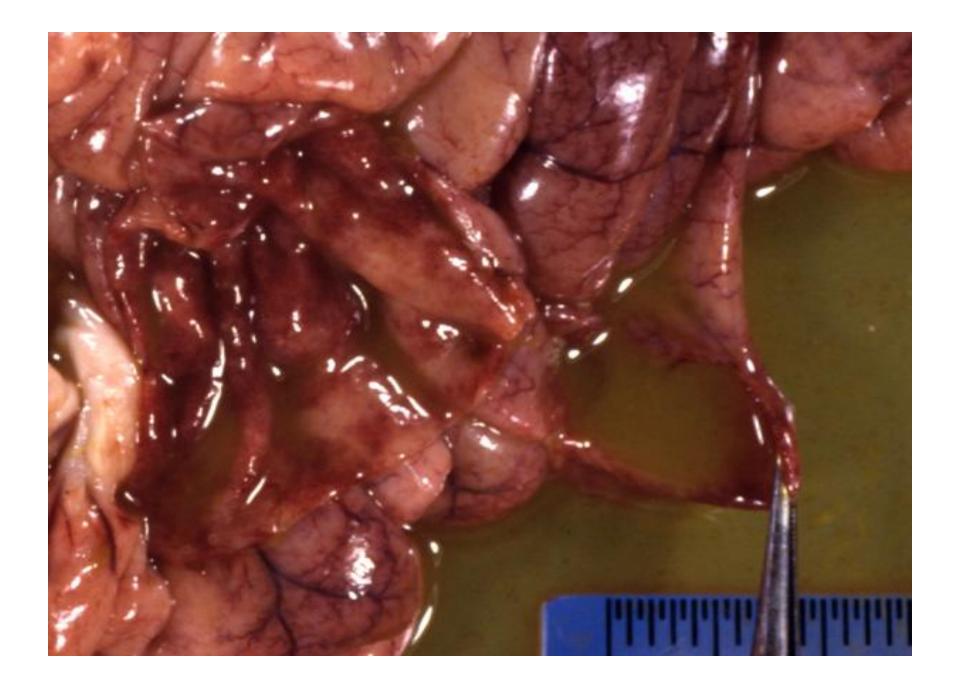

smothering

fires

- veterinary supervision
- heat stress during off-loading can be a problem
- scabby mouth

Preslaughter fasting and Salmonellosis

Fasting → Hunger Decline in rumen microbial activity Increase in rumen pH Increase in Salmonella growth in the rumen Salmonella multiply and pass into the small intestine

ADVISING POLICY MAKERS ON LIVE EXPORT

Brazil has recently received adverse publicity about live cattle export to Lebanon. The criticisms were about general "animal cruelty" rather than any specific welfare problems.

The Government has put out a call for Discussion papers to help Brazil develop a policy. You are interested in submitting a proposal in response to the call.

What will be the main points in your proposal?

Four general approaches

STRATEGIC Identify risks and list all the possible risk management approaches

RESEARCH Evaluate the Animal Welfare issues in the live cattle export trade

ETHICAL Provide the Government with advice on the ethical issues and on conflict resolution

AUDITING Suggest the critical control points in welfare monitoring, auditing and enforcement
